

# LDAP Config RHEL 5 Linux

## LDAP client configuration for Red Hat Linux

To configure Red Hat Linux for authentication against an LDAP server (Oracle Internet Directory, OpenLDAP or MacOSX Directory Server):

```
authconfig --enableldap --enableldapauth --ldapserver="IPofLDAPhost" --ldapbasedn="cn=users,dc=loopback,dc=org" --kickstart
```

```
vi /etc/ssh/sshd_config  
UsePAM yes  
PAMAuthenticationViaKbdInt yes  
  
/etc/init.d/sshd reload
```
