

Show TOP SQL

Show top 25 SQL Statements, sorted per CPU usage:

```
SELECT * FROM
(SELECT s.username,
s.machine,
s.terminal,
a.sql_id,
a.cpu_time/1000000 cpu_time,
a.elapsed_time/1000000 elapsed_time,
a.disk_reads,
a.buffer_gets,
a.rows_processed ,
a.sql_text
FROM v$sqlarea a,
v$session s
WHERE a.sql_id = s.sql_id
ORDER BY a.cpu_time DESC
)
WHERE rownum <=25;
```

Perhaps [MOATS](#) is more efficient.

[Mumbai](#) is also a nice performance monitoring toolset.
